RFID+QR Code Equipment, Safety, and Training Management Cloud System

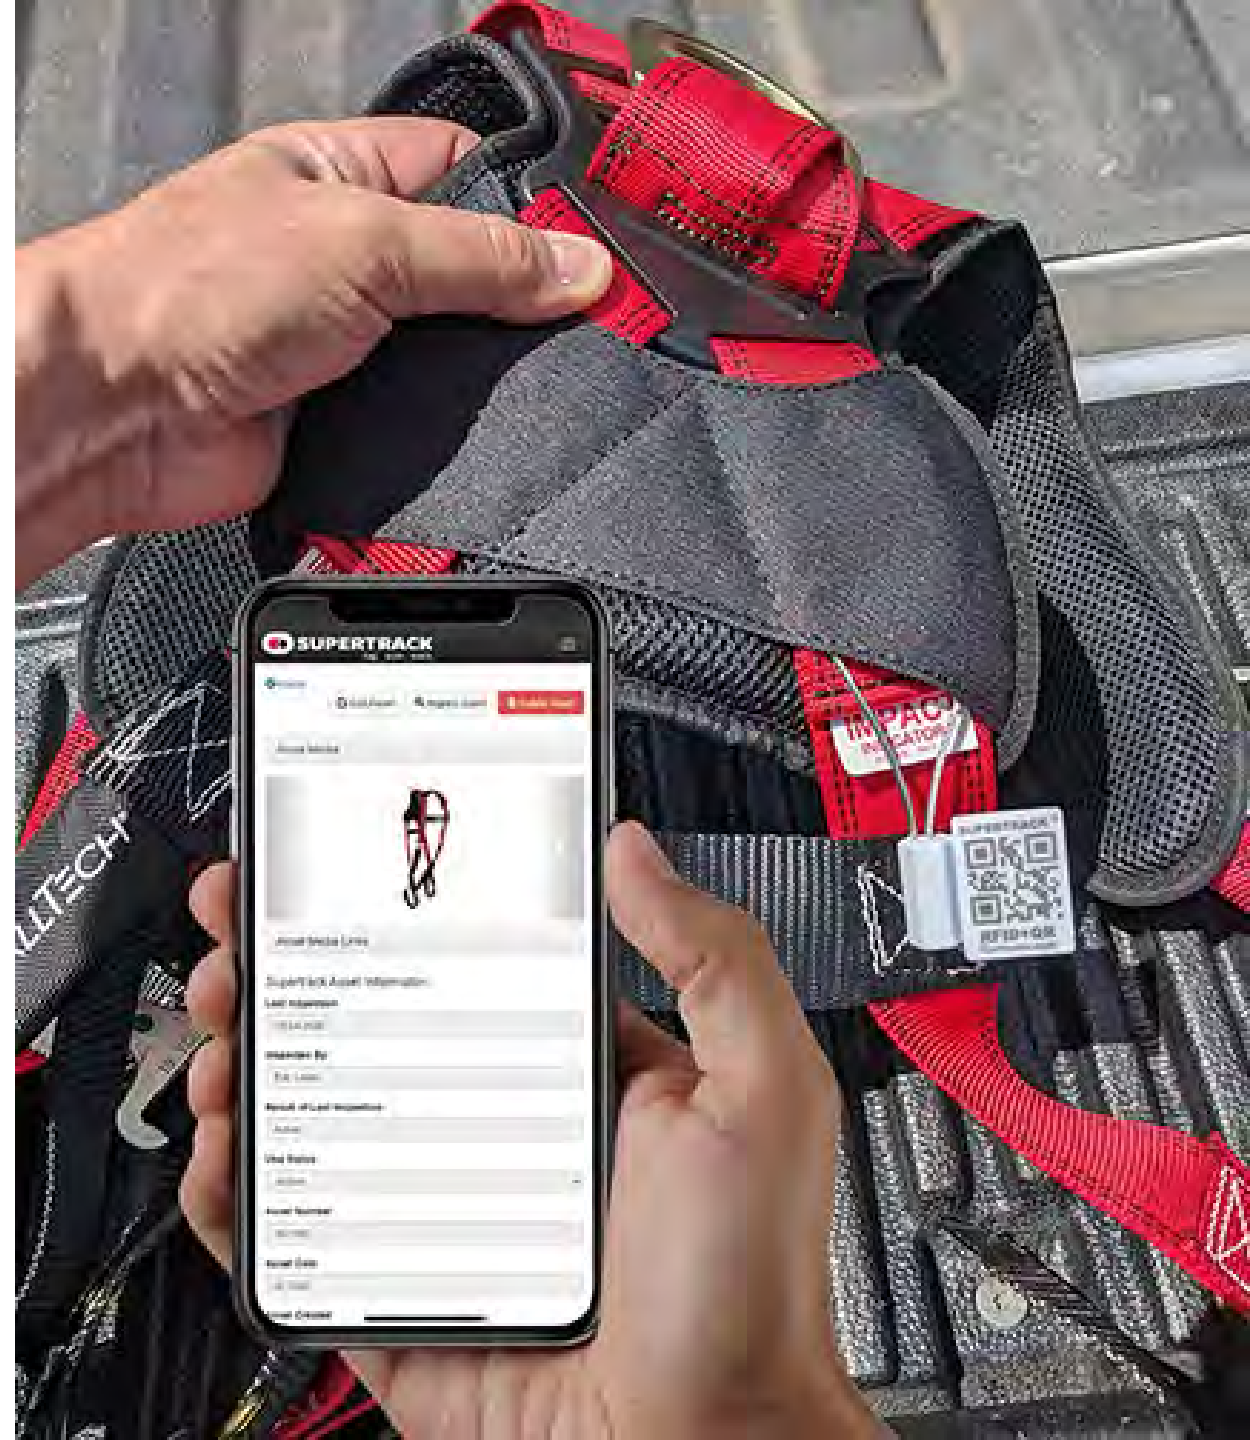

HAVOC

What is SUPERTRACK?

A cloud-based software and mobile app solution that utilizes RFID + QR code asset tags to manage and automate...

- Safety Programs
- Paperless Inspections
- Tool and Equipment Management
- Employee Training and Certifications
- Jobsite Management and Inspections

Why SUPERTRACK?

Stay Compliant

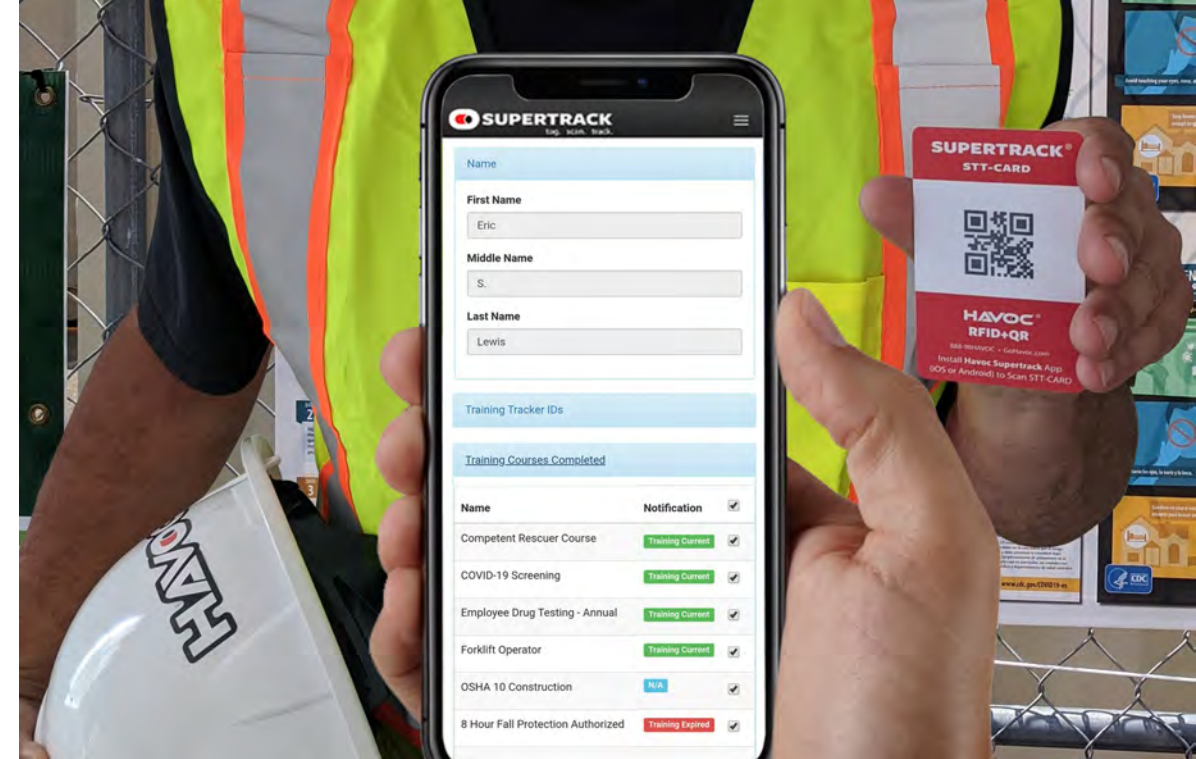

- Never miss required equipment inspections again.
- Create custom safety inspection and checklist forms.
- Conduct paperless inspections and audits from mobile apps.
- View and share past inspections from anywhere.

Increase Safety and Reduce Injury

- Track and manage safety training and certifications to keep employees knowledgeable and safe.
- Know, in real-time, the status and condition of safety equipment to make sure employees are using safe and compliant gear.

Reduce Loss and Theft

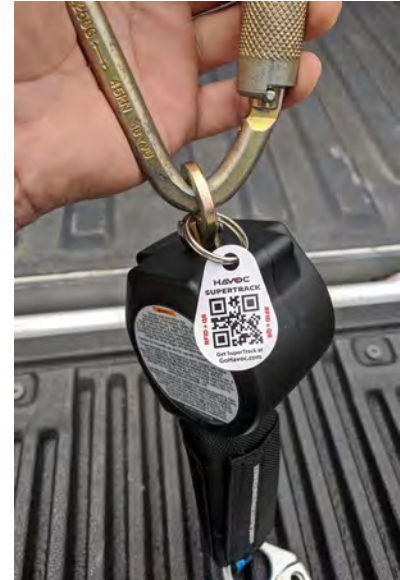

- Assign tools and equipment to employees to increase accountability.
- Track equipment by location, job site, etc. to know what you have and where it is.

Tag. Scan. Track. Inspect.

Tag your assets with Supertrack RFID+QR tags

- Use Supertrack tags on all tools, equipment, vehicles, facilities, jobsites, tool rooms, etc. that you manage, track and inspect.
- RFQR tags come in many different sizes and mounting configurations, for attachment to almost anything.
- Save hundreds of hours per year by instantly knowing every piece of equipment's assigned location and/or employee, and if that piece of equipment has been properly maintained and inspected.

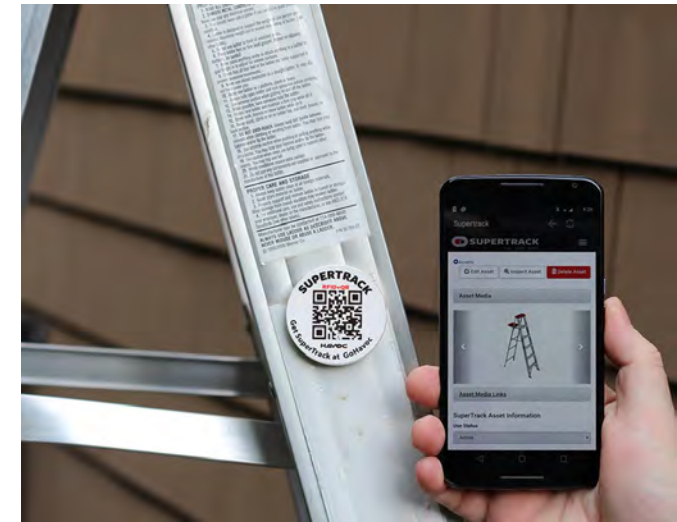

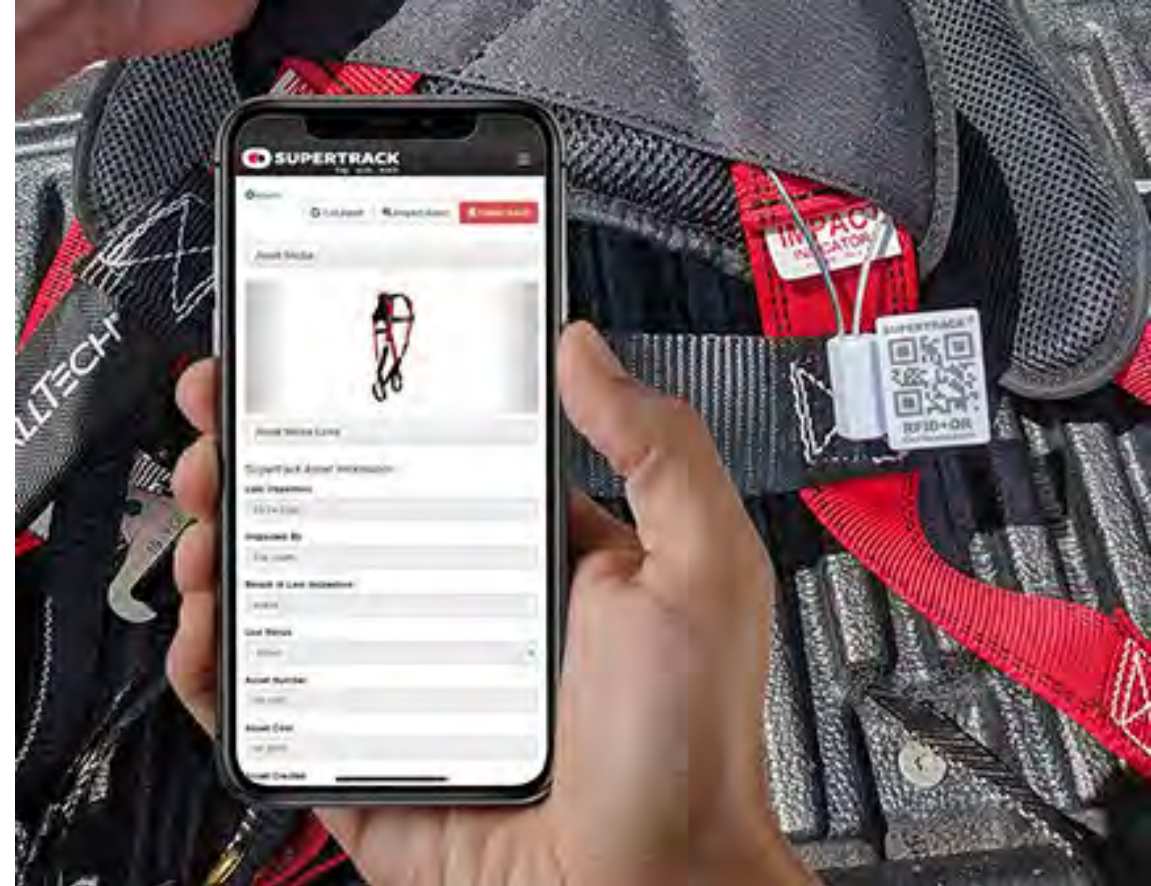

Tag. Scan. Track. Inspect.

Scan your Assets

No Special Equipment Required

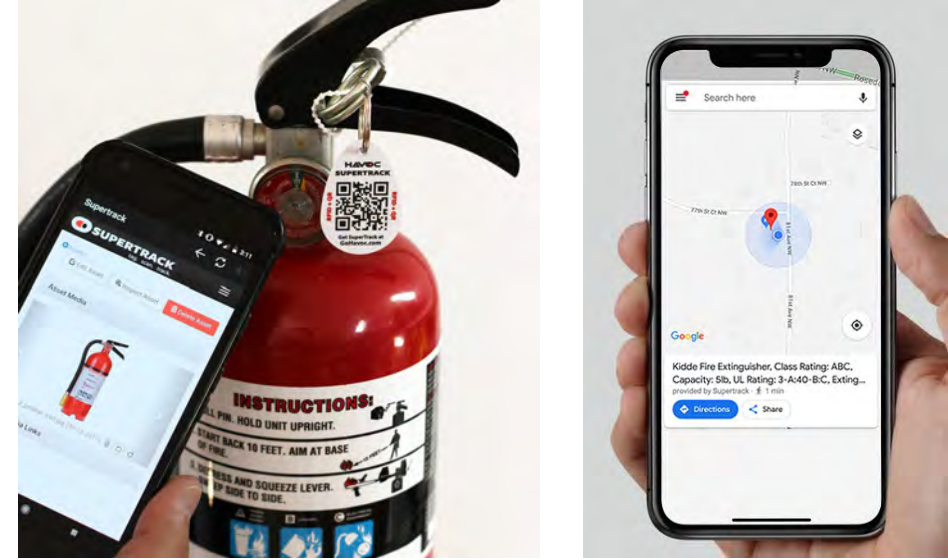

- With Supertrack's iOS and Android apps, you can directly scan RFID+QR tags with your iPhone, iPad, Android phone or tablet.
- No expensive, dedicated scanners required.

Tag. Scan. Track. Inspect.

Track your Assets

- Track assets with last-scanned location GPS data using Supertrack app and Google maps.
- Know where and to whom equipment has been assigned.

Track your Training

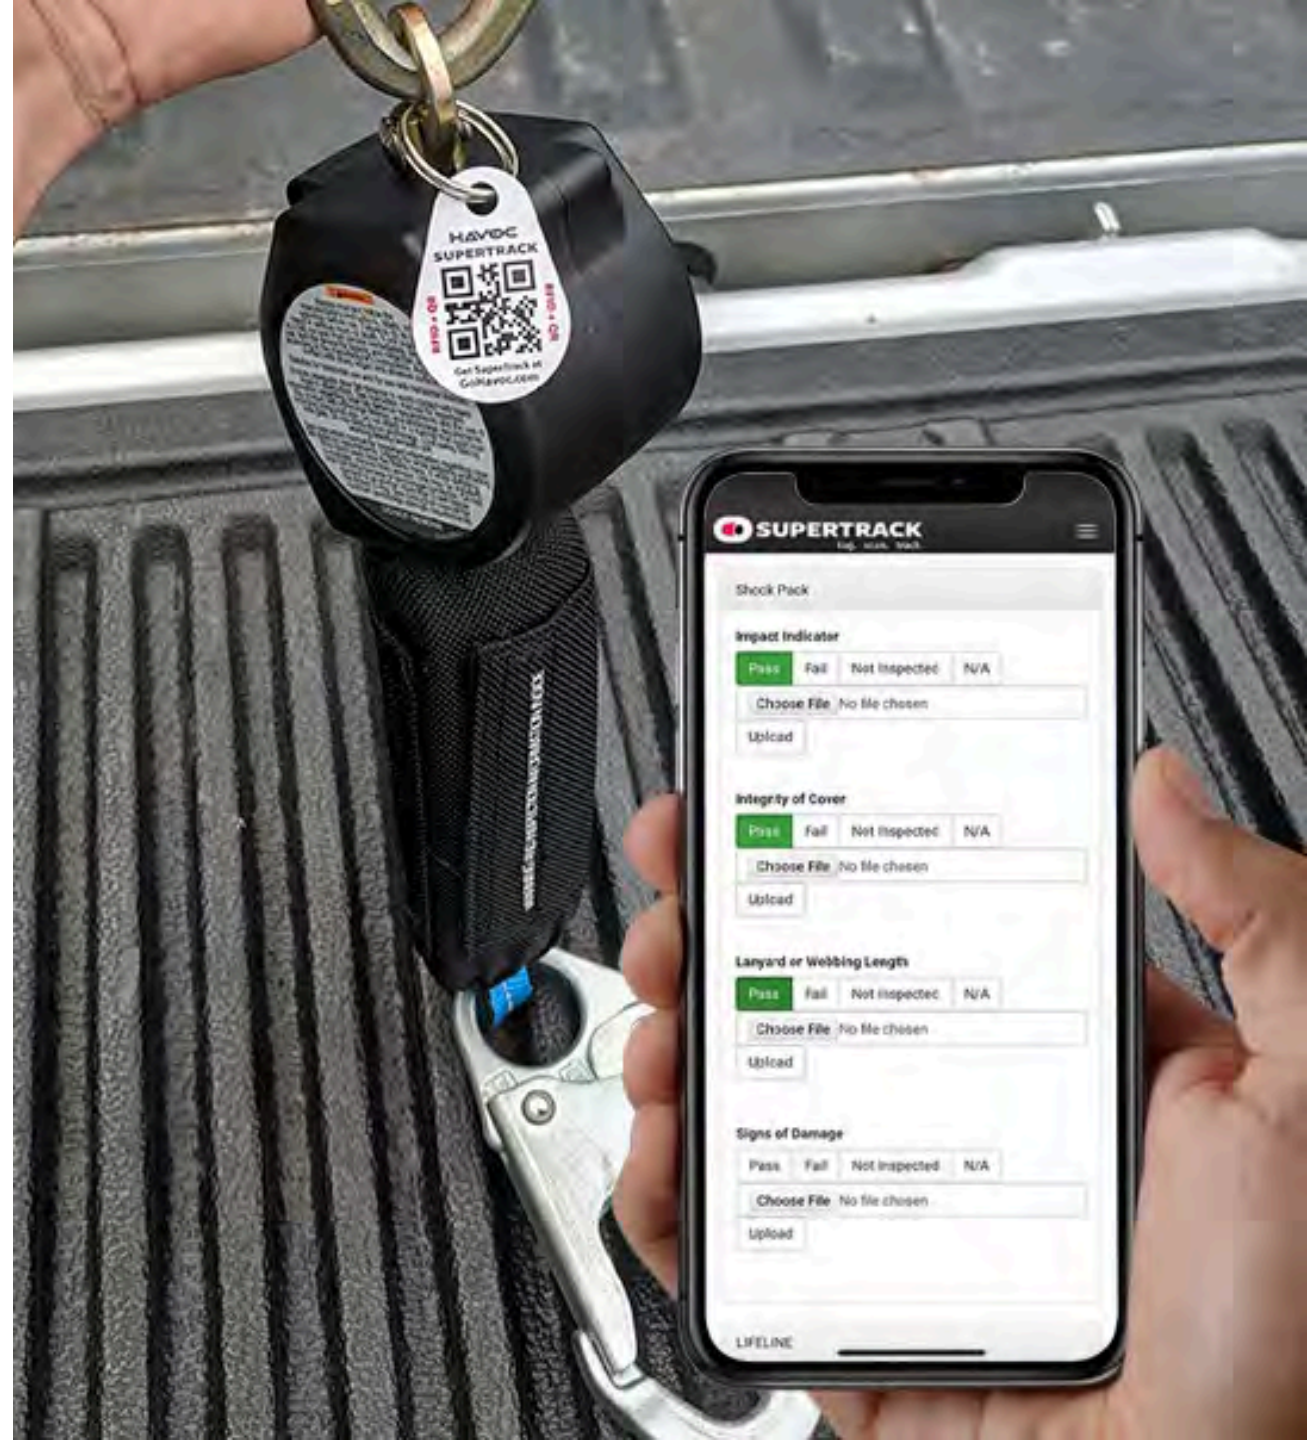

- Organize and automate management of employee training and renewals.
- Issue Supertrack Training Tracker cards for secure, read-only access to employee training records – a paperless self-service solution.

Tag. Scan. Track. Inspect.

Inspect your Assets – 100% paperless inspections in real-time

- Digitize all your inspection forms – safety, jobsite, facility, first aid, DOT, etc.
- Use Supertrack inspection templates, or easily create custom inspection, checklist and audit forms.
- All completed inspections are easily retrieved from anywhere, saved forever. Ensuring recordkeeping compliance.

Your Data. Everywhere you Work.

- Super secure cloud storage using AWS.
- Your data is *your* data. Havoc does not view, access, or sell your data at any level.
- Customers access their private accounts through an TLS protected web portal and mobile apps.

Improve Safety *and* Save Money.

Supertrack **reduces labor costs** associated with equipment management and inspections by up to **40%**, with the following features:

- Eliminate manual sharing of documents and double entry of data.
- Eliminate costs associated with lost or illegible paper forms.
- Dramatically reduce worker time spent 'looking for equipment'.
- Increasing equipment accountability and reduce damage and theft.
- Save employee time by automating repetitive tasks (e.g. scanning a RFID tag instead of manually searching for equipment in a spreadsheet.)

An **American Society of Safety Professionals (ASSP)** published study found that investment in a **cloud-based safety** software system yields an average **4 to 1 return on investment**. For every \$1 invested companies see an average savings of \$4.14.

A **National Safety Council (NSC)** report shows the average cost of a minor workplace injury to be 16 times higher than the cost of prevention, and 48 times higher for serious injuries. An efficient safety program that utilizes **modern technologies pays for itself almost immediately**.

According to a Gartner study, workers spend between 20% and 30% of their workweek **managing paper and/or digital documents** or document-based information. That's about 12 hours of a 40 hour workweek. Based on the average salary of a safety manager, document management for a single employee can **cost a company over \$30,000 per year**.
