## SUPERTRACK USE CASE

### RFID+QR Code Fire Department Asset Management and Inspection

At Havoc, we are always looking for new and inventive ways to help our customers eliminate inefficient and expensive processes. Using Supertrack and our RFID+QR code technology for fire department asset inspections and management is one such use case.

Fire department PPE, SCBAs, turnout gear, controlled substances, stations, vehicles, etc. are mission critical and require precise management and inspection to ensure effectiveness. Each manufacturer and piece of equipment often have specific inspection and end of life / product expiration requirements. Multiple all of this by the amount of equipment at a fire station and it quickly gets out of control.

Get control over your gear and data with Supertrack.
