

SUPERTRACK USE CASE

RFID+QR Code Fire Door Inspection Compliance

At Havoc, we are always looking for new and inventive ways to help our customers eliminate outdated and expensive processes and consolidate systems. Using Supertrack and our RFID+QR code technology for fire door inspections and compliance is one such use case.

The same Supertrack account used for safety and equipment management can be used to uniquely identify each of your facility's fire doors and efficiently complete and retain your annual inspections. By using Supertrack for this application, customers can increase employee efficiency and ensure compliance with NFPA 80 standards.

- RFID+QR Code Fire Door Scan Tags
- Works with Apple and Android Phones and Tablets
- No Dedicated / Expensive Scanners Required
- Cloud-Based and Updates in Real Time
- No Secondary Uploading of Data Required
- Automatic Notifications of Failed Inspections
- Conduct Fire Door Inspections in App
- Take and Save Inspection Photos in App
- Automated Inspector and Asset Identification

Supertrack equipment tags feature both RFID and a QR Code – we call them **RFQR tags**.

RFQR tags can be scanned by all devices - iPhones, iPads, Android phones and tablets, even old models.
